Power Distribution

The building has 120/240 single phase power. The building is equipped with (2) 60AMP, three phase Cam lock tie-ins. One is backstage behind the crossover wall, and the other is in our control booth in the balcony.

Stage & Scenic

Le Petit Theatre is a small proscenium theatre, built in 1922, with several renovations and modernizations since. As detailed in the attached drawings, the proscenium is 28'-10" wide. The total usable stage depth is about 31' (including the pit cover). The stage has very shallow wings left and right. There is a scenic wall about 3' from the upstage building wall that creates an effective cross over path. Our stock soft goods hang includes a dark red grand drape, a light blue synthetic silk like curtain, and three sets of black legs & borders. We do not have a full stage black.

LE PETIT THEATRE

TECHNICAL OVERVIEW SPECS AND DRAWINGS

Lighting

The theatre is equipped with a complete theatrical lighting package. Our theatre stays hung with a complete plot of Source Fours, Fresnels, and Pars, as well as (2) I-Qs and (11) Martin Mac Auras. Our house console is an ETC Ion. We can provide complete rep plot information. Our staff is available to assist with lighting in any way you need. We generally don't rearrange the rep plot for special events, we prefer instead to use our moving lights to take care of any special needs you have.

Sound

Our house sound system consists of (2) arrays of JBL VRX powered speakers for main L&R, (2) AudioTechnica front fill speakers, mounted on the front of the stage, (2) JBL hung speakers just upstage of the proscenium stage right and left and (2) JBL VRX subs that can be placed as needed. We have (6) additional wedges (various types) that can be placed as needed for use as monitors or for practical effects. The FOH Console is a SoundCraft VI3000. This generally lives at the back of the balcony in our built-in control booth. In some situations we may move the audio console to a purpose-built table in the back left corner of the orchestra. Installed and available for use in the theatre is also an Assisted Listening System through ListenTech. In order for this system to be used, the performers onstage must be wearing or using microphones. Patrons are welcome to use their phone to connect to the system or any of the following options paired with a receiver: headphones, earphones, or over ear piece.

Video

A 16' x 10' projection screen is installed and can be flown in just upstage of the grand drape. There is one 8k projector, an NEC NP-PA803U 3 Chip LCD, installed on the underside of the balcony. The native resolution is 1920x1200, which works well on our 16:10 screen. We can project 16:9 video with small black bars top & bottom. The installed playback system is a MacBook Pro, running QLab 5. Video is sent as HDMI via SDI converters through an SDI patch bay installed in the lighting booth. You are welcome to bring your own play back equipment as well, provided it outputs HDMI. We are not able to accommodate DCP at this time, but can recommend vendors who can.

LE PETIT THEATRE

Seating Tiers

effective beginning with 2025-26 Season
